

SWARDMAN

WHEELS FOR TALLER GRASS

Installation instructions

Wheels for taller grass

The set of wheels for taller grass is intended for occasional mowing of overgrown lawn, for example after a holiday. Wheels for taller grass improve the mowing efficiency of tall grass.

The wheels are suitable for working with a verticutter or scarifier cassette.

Swardman does not recommend using these wheels for long term due to acceleration wear the cutting spindle.

Package contents

1. Set of wheels
2. Instructions

Safety at work

1. Use protective equipment
2. Install on a pad away from the lawn
3. Used packaging discard ecologically

Installation instructions

1. Remove the front roller of the mower (wrench size 10 + pliers to hold the axis)
2. The wheels are mounted on the inside of the front cylinder bracket
3. Insert the screw into the hole (into the groove) so that the washer is on both sides
4. Tighten the screws thoroughly using a hex key 5
